

## Assignment 4

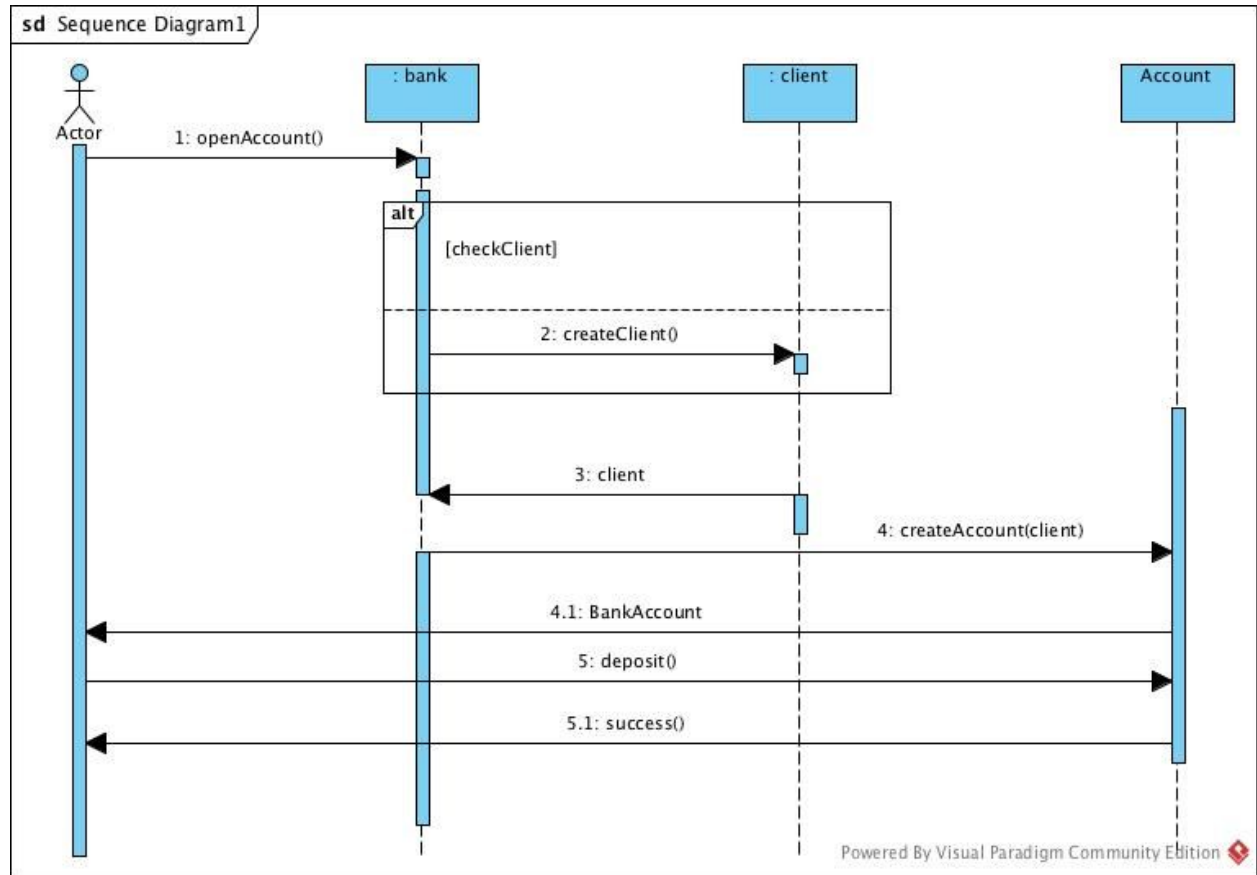

### Part1:

E152-

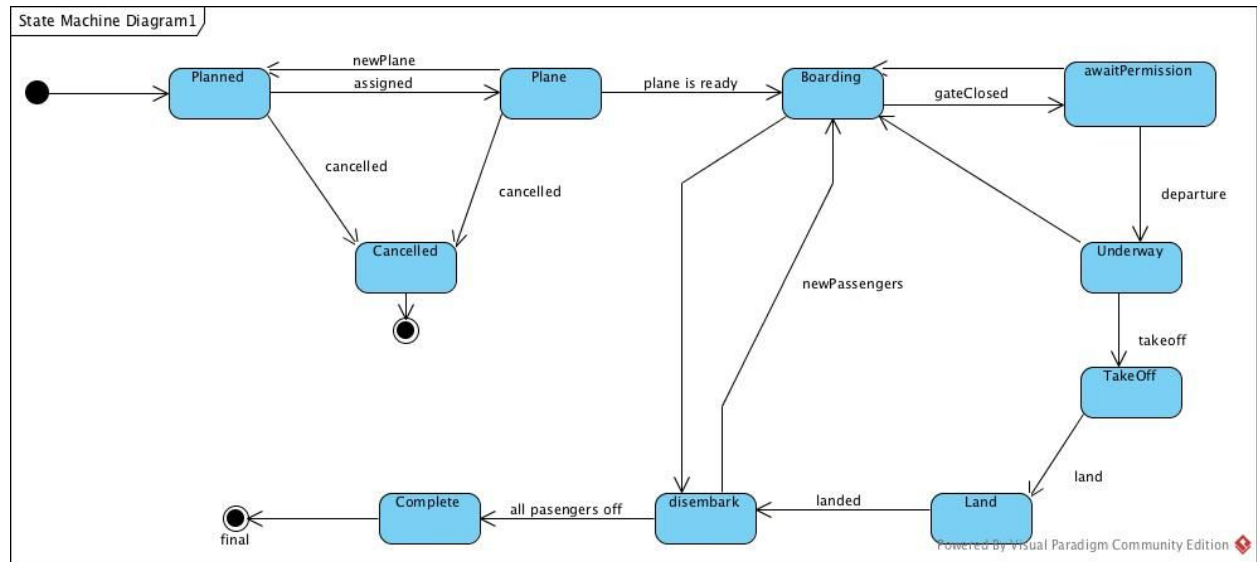

B)

C)

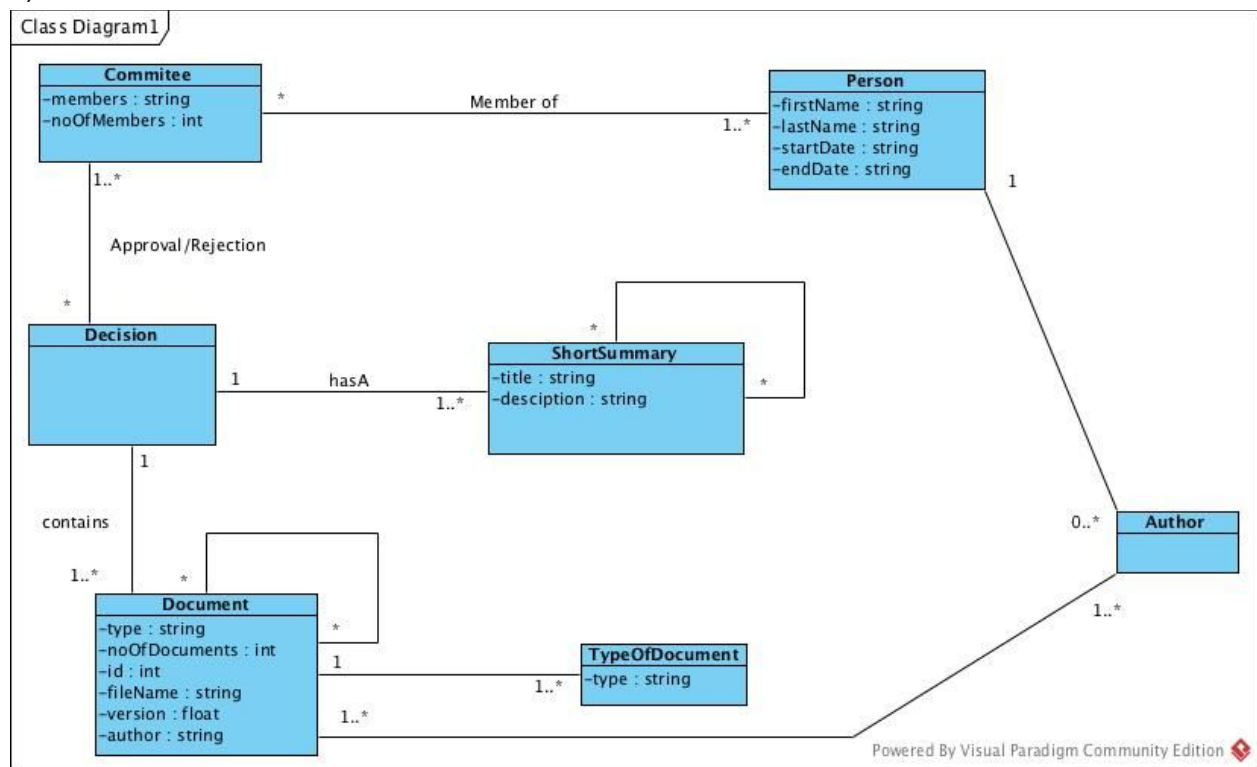

B)

## Part2

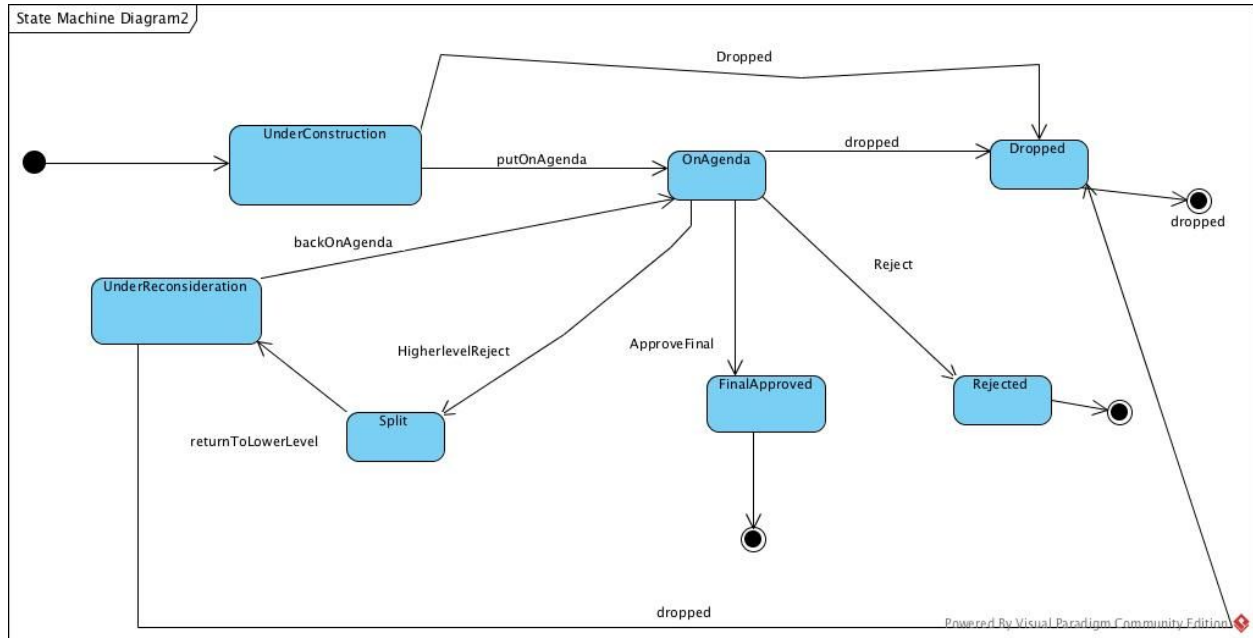

A)

Assumption: The change request document is a type of document NOT a separate class.

B) The diagram can be improved by implementing the abstract occurrence pattern, and facade. Document can be the abstraction while the type of documents would be the occurrence. It would be a 1 document to many occurrences of that document.

C)

Assumption: split means that it was accepted at a lower level but rejected at a higher level. If it is rejected, it is rejected at all levels and the project is scrapped just as if it were to be dropped. You can be split then re evaluated but once rejected it cannot be re evaluated. At any point it can be dropped.
